

The Top 10 Classroom Glow Up Checklist

A more comfortable, engaging, and functional classroom starts with the space.

Use this quick checklist to take a fresh look at your classroom.

- ☐ **1. Check the flow of the room.**
Can students and teachers move easily between desks, tables, supplies, and learning areas without unnecessary congestion?
- ☐ **2. Look at your furniture arrangement.**
Does the arrangement support the way you actually teach - whole group, small group, independent work, and collaboration?
- ☐ **3. Create a purposeful calming space.**
Is there a comfortable, clearly defined place where students can pause, regulate, and return to learning?
- ☐ **4. Rethink flexible seating.**
Do students have appropriate seating choices without the room becoming distracting or difficult to manage?
- ☐ **5. Make frequently used materials easy to reach.**
Can students independently access the things they use every day?
- ☐ **6. Take a fresh look at your walls.**
Are bulletin boards and wall displays supporting learning, or has visual clutter started to take over?
- ☐ **7. Consider student comfort.**
Think about lighting, seating, temperature, noise, and other factors that can affect students' ability to focus and learn.
- ☐ **8. Don't forget teacher comfort and convenience.**
Your classroom is your workspace, too. Are the materials and supplies you use most located where you actually need them?
- ☐ **9. Look at the classroom from a student's perspective.**
Sit in several student seats. What can students see? What can't they see? Are there distractions or obstacles you haven't noticed?
- ☐ **10. Ask: "Does everything in this room have a purpose?"**
A classroom doesn't need to be Pinterest-perfect. It should work for you, your students, and the learning happening there.

Ready for a Classroom Glow Up?

A fresh set of eyes can change how you see your classroom. Research-informed consultations support student engagement, comfort, learning - and the teacher who spends every day there.
